

RACING P-V

RACING P-V are ropes with a Vectran® fibers (Liquid Crystal Polymer) core, covered by polyester jacket for extra UV and abrasion resistance.

Construciton: 12 strand Vectran® core. 16/24/32 strand polyester cover.

Features: Good abrasion and heat resistance, high load uses. The Vectran® core also offers low creep and minimal elongation. With treatment of UCS.

Application: Halyards. Control lines. After guys.
